Office Action Summary	Application No. 10/829,143	Applicant(s) RAFFANIELLO, SAMN	
	Examiner DEBBIE K. WARE	Art Unit 1651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 October 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 1-3 are presented for consideration on the merits.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 17, 2008, has been entered.

Response to Amendment

The amendment filed October 17, 2008, has been received and entered. Further, the declaration filed October 17, 2008, has been received and considered. The declaration has been successful in overcoming the prior art rejection. In addition, the arguments in the response have been deemed persuasive.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims are rendered vague and indefinite for the recitation of "and/or preventing excessive formation" since an excessive amount of scarring is subjective and because

Art Unit: 1651

the scarring still does occur and is not prevented per se. It is suggested to delete the phrase. Claim 3 is rendered vague and indefinite because it is uncertain whether or not the Markush group is intended to mean that each individual component is selected separately or not, and it is unclear whether any other agents are intended to be encompassed by the group. It is suggested to delete "chosen" and "or" and insert --selected-- and --and-- , respectively.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the selection of ancrod, urokinase or streptokinase for use as a defibrinogenating agent in a method for minimizing scarring , does not reasonably provide enablement for any defibrinogenating agent. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to carry out and practice the claimed method of the invention commensurate in scope with these claims. The specification does not provide sufficient guidance to select for any agent without undue burden of experimentation.

The exemplified disclosure does not demonstrate a broad study design for the selection with an reasonable expectation of success for using any other agent than ancrod, for example. Furthermore, although the art recognizes that urokinase and streptokinase are active defibrinogenating agents, there is no showing either in the prior art or Applicants' own disclosure to support the use of valproic acid or phenobarbital.

Art Unit: 1651

Hence, the claims are claimed too broadly for the enabling disclosure without undue burden of experimentation since the unpredictability in the art that any other defibrinogentating agent will minimize scarring.

The claims are rendered free of the prior art.
